He Quotes History, Acts of Congress an Orders to Mint Directors In Relation to the Coinage of

WASHINGTON, May 8. - Secretary Morton has written a letter to James A. Cherry, of Denver, Col., in reply to a letter from that gentleman criticising some statements in the interview with the secretary of agriculture, printed a couple of weeks ago, which caused so landlady, at least six or seven persons

much comment. It is as follows: From your letter of April 22, 1895, it appears that you and I perfectly agree on the funda-mental point, namely, that demand and sup-ply inexorably regulate all values whatsoever, at all times and in all places. At what points do we begin to separate from each other and These points are only two—the first historical and the second logical.

"You assume certain propositions to be true of silver, which are not historically true at all, but quite the reverse of true. You say, for in-stance: 'Until 1873 the chief use of silver was for coinage. It had other uses, but the demand for it for coinage purposes was steady and

"On this point you have been monstrously misinformed. The first federal coins of silver were minted in 1794, and of gold in 1796. Their ratio, as recommended by Alexander Hamil-ton, and fixed by an act of congress, was 15.1. It was hoped thus to keep the two metals in equilibrium in coinage. But they would not come in equilibrium at that rate; still less would they stay there.
"Only 312 dollar pieces were coined at the

American mint in the entire year of 1805, be- | sured. cause the silver was worth more out of the coinage than in it and worth more for export than for domestic money. What was the mat-ter with those silver dollars? Nothing, only they were too valuable. May 1, 1806, there came an order from President Jefferson to the director of the mint at Philadelphia, "that all the silver to be coined at mints shall be of small denominations, so that the value of the largest pieces shall not exceed half a dollar.' "The reason given by the president for this

able that further purchases and exportation "The coinage of silver dollars, thus authoritatively suspended at the American mint, was not resumed there for thirty years. In these few facts, which are official and unquestionable, behold the beauties and advantages of a double standard; of the unlimited coinage of both metals in an equal and constant ratio with each other; of two vardstocks of different lengths to measure cloth by in the same mar-

been made of dollars coined at the mint for the

purpose of exporting them and that it is prob-

"By the law of 1834 the ratio was sub-stantially put at 1 to 16. But this was going too far in the opposite direction. Gold was not worth 16 in silver in the markets of Europe. Consequently the international current of the metals was for a time reversed, silver passing in preference abroad to liquidate the balances of trade and gold coming in small quantities to the United states, where it was more than 3 per cent. dearer in silver than in Europe. By 1953 the immense disadvantages of a double standard' had become so plain to all thinking people that congress wisely determined to abandon the utthe two metals, and to make gold the legal- good stroke of business to them. tender for debts, except for sums of five dol- The United States steamship Alert lars and under. In the second place. Mr. Cher- arrived on Monday last at San Juar instance of a historical assumption contrary to facts and natural inferences, allow me respectfully to call your attention to the use, in common with many of the bimetallists so-called, of the date 1873 as the time 'demone silveredollar is not mentioned at all, one way, or the other, in the act of 1873. All the demonetization of silver, as I understand it, that ever came about in this country, happened in the law of 1853, after open and full discussion, and practically with unanimity, when congress took away the legal-tender quality of all silver in payment of debts of over \$5 in amount.

"You employ over and over again in your letter the two most common logical fallacies that enter into the speech of argumentative men everywhere, namely, putting cause into the place of effect, and assuming that because one thing happened after another in point of time, therefore it was the result of that other. "Let us look candidly at the instances of these, known almost at random. You ask. "What creates demand?" and answer, "use." I

ask, in my turn, 'What creates use?' and an-swer, 'demand.' Why is it that there is so lit-in a newspaper which he controled tle 'use' of silver dollars in this country to-day. and used in this instance, at least, as while there are millions upon millions of them lying idle? I answer confidently because there is no adequate 'demand' for them. Have you not innocently but badly mixed up 'cause' and 'effect' in this case? Demand, in the common sense, is nothing but desire for something on the part of one man, coupled with his willingness to pay something for it, satisfactory to

the sense of clamoring still for 'unlimited coinage' when the treasury can not get rid, by hook or crook, of that 'already' coined and lytug in useless heaps? They are well minted of just weight, nine-tenths fine, are legal tender for all debts and bear the legend: 'In God

What alls them? I answer, and so must you, on reflection, there is no 'demand' for them, of the striking garment workers were and therefore no 'use' for them. What more further depleted yesterday by 300

finance, you have overlooked, in whole or in part, the momentous fact that all but a mere fraction of the world's commerce is mediated by instruments of credit and not by metallic money at all, whether of gold or of silver, and that by far the most essential service of money in this age of the world is to furnish a steady

A HOTEL HORROR.

Barning of the Arlington Hotel at Montrose, Col.-C. W. Nehros, Agent of the John Deers Implement Co., Burned Beyoud Recognition. MONTROSE, Col., May 10.-The Arlington hotel took fire Wednesday night a 11:45. Cause unknown. The building was burned to the ground in a few minutes, with the W. C. T. U.

reading room on the rear. In the flames perished the agent of the John Deers Implement Co., C. W. Nehros. Other guests and help in the hotel escaped by jumping from the second story windows. Had it not been for the heroic efforts and presence of mind of Mrs. E. H. Smith, the would have been burned.

Mrs. Smith jumped from the secondstory window, twenty feet, to the ground, striking her head and sustaining severe internal injuries. She now lies in a precarious condition. C. L. Buck, agent for the Lee Clark

Sanderson Hardware Co., of Omaha, jumped from the second-story window injuring both sides.

John L. Teeters, of Teeters & Scott, wholesale jewelers, Lincoln, Neb., jumped from the second-story and was cut by broken glass. Mr. Nehros only arrived in town

Wednesday, and intended to go from here to Delta, returning yesterday. Had he done so he would have escaped. He was found lying on his face, hands and knees in the attitude of crawling, burned beyond recognition. Loss, about \$12,000; partly in

MAY PROVE ENGLAND'S LOSS. The Smart Money Exacted From Nicaragua Likely to Hurt British Commerce in

Central America.

MANAGUA, Nicaragua, via Galveston, Tex., May 10.-There is no longer any doubt that Great Britain will receive her smart money on time. The order was that considerable purchases have £15,500 to be paid by Nicaragua to Great Britain has been raised here by popular donations. Three German mercantile firms gave about £2,000, and the whole amount will be ready to be paid in London in a few days. The raising of the money, however, has only increased popular feeling in Nicaragua against the British, and the feeling is now very bitter indeed, more so than when the British landed at Corinto. The general opinion seems to be that Central American republics will form a combination, possibly secret, against Great Britain, and that everything possible will be done to exclude British goods from Central America. This feeling will probably result in commercial gain to the United States. There is no doubt, however, that the action of the German firms in subscribing so liberally terly futile attempts to secure the 'parity' of to the indemnity fund will prove a

That Mr. Thurston is on terms of official intercourse with official issue of the department, con-"absent" after it. Secretary Gresham's letter was sent to Japan by mistake

THE TREATY OF PEACE

Between Japan and China Exchanged at Che-Foo Japan Relinquishes Liao Tung, But Does So with a Proviso that a Suitable Indemnity Shall be Paid, and, it May be, After a Term of Years.

WASHINGTON, May 10 .- An official dispatch from Tokio, received at the Japanese legation yesterday afternoon, states that the ratifications of the treaty of peace between Japan and China were exchanged at Che-Foo on Wednesday. It is understood that no change was made in the text of the treaty as originally concluded, but that taking into account the recommendations made by Russia, Germany and France, the Japanese government has agreed to renounce the permanent possession of the Liao Tung peninsula, on condition, however, that the arrangements regarding the form and the terms of the renunciation shall be reserved for adjustment between itself and the government of China.

This latter stipulation is construed to mean that Japan will not surrender the peninsula until a suitable indemnity shall have been paid, and that it may even be agreed between Japan and China that the possession of Port Arthur itself will be retained for a term of years extending beyond the date when the indemnity shall have been paid in full, thus guaranteeing to Japan not alone the payment of the indemnity itself but also sufficient time to safeguard itself against anything like a war of reprisal.

The treaty of peace itself provides that Wei-Hai-Wei shall be held until the first \$100,000,000 taels and the next two annual installments of the indemnity have been paid, so that with the added guarantee of the possession of Port Arthur, even although only temporary, the Japanese government appears to have taken every possible precaution for the future.

The facts would thus seem to be exactly as reported in United Press dispatches from time to time ever since the peace negotiations were entered upon, and effectually dispose of the numberless canards sent out by Reuter's agency and Shanghai correspondents circulated by the European press.

RETIREMENT OF GEN. CASEY After an Active and Eminently Useful Ca-

reer as an Engineer. WASHINGTON, May 10.-The retirement to-day from active service of Brig.-Gen. Thomas L. Casey, chief of engineers, which office he has held since 1888, possesses more than passing interest to the general public because of the great public works that have been completed under his direction.

Gen. Casey was born in New York, his father, Gen. Silas Casey, being a distinguished army officer. He was graduated from the West Point military academy in 1852, standing at the head of the class, which included among its members such men as Henry W. Slocum, D. S. Stanley, Jerome Boaparte, Peter T. Swaine, Alexande D. McCook and George Crook.

With the exception of two years' service as assistant engineer in the construction of Fort Delaware, he was attached to the West Point academy as instructor of engineering, leaving there as lieutenant in 1859 to take command of engineer troops in Washington territory.

When the civil war broke out he was appointed assistant engineer on the staff of the general commanding the department of Virginia. In August, 1861, he was made captain and superintending engineer in charge of the permanent defenses and fortifications on the coast of Maine and on recruiting service for engineer troops, which duty he performed until 1866.

In the meantime he was engaged on special duty with the North Atlantic squadron during the first expedition to Fort Fisher, N. C., and as a member of a special board of engineers for work at Willet's Point, N. Y., and for work on forts in Maine, since abandoned. During the war he was promoted to

the rank of major, and his service gained for him the brevet ranks of lieutenant-colonel and colonel. From 1866 to 1877 Maj. Casey was superintending engineer of -Forts Preble and Scannel, in Portland harbor, Me. In 1877 he was placed in charge of the public buildings and grounds at Washington, a position he retained until 1888, a period marked by many improvements in public buildings, parks and avenues of the capital. The fine building occupied by the state, war and navy departments was constructed under his supervision, and the Washington monument, which, for a generation had re mained a broken marble shaft, was finished under his direction in 1884.

In 1874 he was advanced to lieutenant colonel, and in 1884 to colonel. Since 1888, when he became chief of engineers, Gen. Casey has expended nearly half a billion dollars for the government in river and harbor im provements, public buildings and grounds and coast defenses.

A BIG WINDFALL An Express Driver Falls Heir to Six Hun-

dred Thousand Dollars. DENVER, Col., May 10.-Thomas

Gwillin, aged 23, employed as driver on an express, has received word that he has fallen heir to \$600,000 by the death of a distant relative in England. the letter so notifying him ,inclosed a draft for \$11,000 to enable him to reach home. He bought a third-class ticket through to London yesterday morning for \$43 and left on the first train.

AN ILL-ADVISED STRIKE Throws Nine Hundred Employes Out of

Work. Morristown, Pa., May 10.-Nine hundred employes in the woolen and worsted mills of James Lee & Son, at Bridgeport, are thrown out of employment. Three hundred of the hands struck for an increase in wages and the firm decided to close down the mills. The increase demanded was 40 per cent. One hundred hands of the Woodstock woolen mills and seventy at Rambo & Regar's hosiery mill have also struck for an advance.

LAUNCHED AT POLA.

Pola. May 10.-The new Austrian war ship Monarch was launched here vesterday morning in the presence of Emperor Francis Joseph and an immense gathering of people, including a large number of distinguished persons. The town and the shipping in the harbor, including many yachts, were gaily dressed with flowers, flags, streamers, etc., and visitors kept coming into the town until long after the ship had taken the water.

DUN'S COMMERCIAL REVIEW.

Foreign Exchange Demoralized by Enormons Bond Sales Abroad—Crop Prospect Greatly Improved. Doing Much to De-termine the Character and Volume of All Business After Summer Uncertainties are

Over-A General Improvement. NEW YORK, May 11 .- R. G. Dun & Co.'s weekly review of trade, issued to-

The event of the week is the demoralization of foreign exchange caused by enormous sales of bonds abroad. Besides a sale of \$10,000,000 Manhattan and other railway bonds through the syndicate, large purchases on foreign account have been recorded for some weeks, so that the aggregate probably exceeds \$50,000,000 since the sale of the new governments. Safety for the summer means much for all business, and the syndicate deems it so fully assured that it distributes 40 per cent. of the money advanced by the associates, which leaves a large amount to stimulate operations in securities and prod-Crop prospects, also, have greatly

importance, as it will do much to determine the character and volume of trap. all business after summer uncertainties are over. In addition business is reviving, though the gain in great industries is retarded by many strikes. The volume of business represented by exchanges for the first full week of May is 27.2 per cent. larger than last year, and only 17.2 per cent. less than in 1893; but bond and speculative operations have so swelled transactions here that the gain of 14 per cent. over last year outside New York is for the moment a closer indication of general business. Railroad earnings are also better, for the last week of April and the loss for the month compared

improved, and this is of still higher

with 1893 is only 11.7 per cent. The successful bond transaction caused flames of speculation which had been dying out to blaze up fiercely. Stocks have risen on an average \$1.75 for railroads and 52 cents for and safety for the summer seems asments reaching beyond May which are not vet verified.

During the week \$3,250,000 came in is not fully employed, and government sucked in.-N. Y. Post. reports an increase of \$12,356,288 in circulation since April 1. Those who think the supply deficient should observe that the total circulation is 155 per cent. of aggregate clearings in the irst week of May; in 1894 it was 93 per cent., in 1893 only 126 per cent., and in 1892, with high prosperity, 134 per cent. The demand for commercial loans is smaller this week.

Sales of wheat for the week have 000,000 the previous week and 81,000,ton 542,000 bales, against 1,046,000 the previous week and 1,192,000 the week

But Thursday brought new activity. Wheat had fallen 236 cents, but rose 2 cents that day. Western receipts are 1,667,619 bushels, against 1,261,764 last He had hardly taken ten steps when year, and Atlantic exports, flour included, 1,615,051 bushels, against 2,214.-041 last year. In three weeks since the rise in wheat these exports have been 5,160,121 bushels, against 5,849,971 last vear. Pork has fallen 25 cents per barrel, lard 20 and hogs 30 cents per 100 pounds. Cotton is lower and receipts, in spite of familiar predictions of a

The industries were distinctly gaining when strikes began, which have spread quite widely. Garment workers in several cities and the Pocahontas coke workers are still out, with several thousand workers loafing near Providence. Other woolen mills and the furnaces in the Shenango and Mahoning valleys, which were making 25,000 tons per week, have stopped; also the Illinois steel works, the largest western concern so that their works are directly affected, which produced 3 per cent. of the output April 1. The Amalgamated association also proposes a

struggle over the new scale. Sales of wool for the week are less than in 1892, but larger than in the past two years, though prices do not rise. Rather more demand appears for men's woolens, but cancellations are also numerous, and imports of woolen houses were about \$19,000,000 in the \$5,000,000 last year. Cotton goods con-

and wounded him. All the jewelry and most of the money taken from the stage was re-

A DEAD INVENTOR.

Ship, Dead at St. Louis. St. Louis, May 11. - Andrew H. Lucas died at the city hospital at 6:30 a. m. The cause of his death was dementia, resulting from a series of bitter disappointments extending over many years Mr. Lucas was born in Ireland fifty nine years ago. He possessed marked inventive genius, and evolved a num-

er of valuable mechanisms. During late years he was more prom inently known as the original inventor of the Lucas ship.

THE DELICIOUS LOBSTER.

It is Not Altogether an Easy Matter to Fish for Them.

narmless looking by any means. Without the claws, an old fellow should measure from one to two feet in length, and will weigh altogether from five to ome so fierce as to reduce the numbers and size all along the New Enland coast. Occasionally an old-times is caught-one that weighs as high as twenty-five pounds. Such a monster is a veritable fighter, and a fierce struggle is sometimes experienced before the creature is landed safely. The claws of a large lobster are powerful enough to crack the shell of a clam or to snap off a man's finger. Instances are on record here where fingers have been thus nipped off, and where severe injuries have been inflicted on hands and arms. The fishermen are consequently very cautious when they land a big lobster, and take particular pains to see that he is well secured before taking him out of the

According to the fishermen here, the lobster sheds his shell for the first time when he is about five years old, but no one seems to be able to tell how often after that the shedding occurs. The young lobsters, a few inches in length, have very little power to themselves, and they generally seek refuge under their mother's shell when danger approaches. If startled by enemies when away from their mother. they will run into conch shells or other places of refuge. The parent lobster shows the same maternal instincts, noticeable in all living creaexceeding last year's by 10.8 per cent. | tures. If her young are pursued by enemies, she is pretty sure to enter into the race also. Her powers of locomotion are pretty good at such times and her fighting abilities of no mean order. Very few fish or shell creatures can withstand her onslaughts or give effective battle to her. One stroke of trusts, and an easier money market her powerful claws will suffice most enemies. The food of lobsters consists sured. Coal stocks, however, have for the most part of clams, mussels, risen sharply, with reports of agree- flounders, sculpin and other fish that get within their reach. They seize these creatures with their strong anterior claws, and hold them up to the from the interior, showing that money | mouth while the substance is slowly

INDIANS CAN HIDE.

One of Them Gives an Exhibition of Skill

Suggestive of Dime Novels. The wonderful skill with which the Indian can hide himself in the open prairie is often referred to. In a book on Indian life, particularly among the Apaches, an incident of this is given. The writer says that while crossing the been 34,000,000 bushels, against 95,- prairie with his guide, an Apache named Quick Killer, the latter offered 000 the week before, and sales of cot- to show how it is possible for an Inian to accomplish when there is apparently nowhere to hide.

The offer was accepted, and the traveler was told to walk forward a Quick Killer called and announced that he was ready to be found.

There was a little bush near, the only break in the prairie about, and to this the traveler returned. Quoting his own words: "I went round it three or four times and looked in every direction, but the prairie was smooth and unbroken. It seemed as if the earth great decline, still exceed those of had opened and swallowed up the man. "Unable to discover him, I called and told him to come forth, when to my
